

Professional Summary

Results-driven ServiceNow Consultant and Developer with 3+ years of experience delivering end-to-end digital transformation engagements for global enterprises. Combines deep platform expertise — across ITSM, HAM, SAM, CMDB, App Engine, and AI-powered workflows — with strong consulting fundamentals including client discovery, solution architecture, effort estimation, and governance. Certified ServiceNow professional (CSA, CIS-ITSM, CIS-HAM, CIS-SAM) with demonstrated success in pre-sales POC delivery, managed services leadership, and training. Brings a rare blend of technical depth and business acumen to drive measurable outcomes across complex, multi-stakeholder environments.

WORK EXPERIENCE

AWC Software Pvt. Ltd. | Senior Solution Consultant & Developer (Noida) May'25 - Present

Led end-to-end ServiceNow implementations for enterprise clients across Medical and Manufacturing industries, owning the full delivery lifecycle from stakeholder workshops and solution architecture through development, UAT, and post-go-live support. Managed cross-functional teams, authored SOWs and architecture models for Fixed Price and Change Request engagements, and served as Training Lead for a 15-member onboarding cohort on ServiceNow Core and ITSM fundamentals.

Key Projects

1. Logbook Digitisation | Dr. Reddy's Laboratories (DRL)

- *Designed and delivered a fully paperless SOP management system deployed across 25 manufacturing plants pan-India, eliminating manual logbook processes and reducing compliance risk*
- *Automated recurring monthly activity creation, generic assignment generation, and audit trails — resulting in significant reduction in manual effort and human error*
- *Leveraged App Engine and Flow Designer to build a scalable, plant-agnostic solution adoptable without per-plant customisation*

2. Approval Digitisation & Transformation | Enterprise Client

- *Architected a code-less **Routing Identification System (RIS)** enabling dynamic, multi-level approval workflows configurable without developer intervention*
- *Solution supported approval, rejection, and refer-back flows with auto-generated approval chains scaling up to **40 hierarchy levels** — covering the full organisational approval matrix*
- *Eliminated dependency on hardcoded approval logic, reducing change request turnaround for approval modifications from days to minutes*

3. Custom CSM Ticketing System | App Engine

- *Designed a cost-effective, App Engine-native customer ticketing system that replicated core CSM capabilities without requiring additional CSM licensing — delivering measurable license cost savings for the client*
- *Built dynamic flow-based routing and SLA management to ensure consistent customer response standards*

4. Managed Services Lead | Post-Implementation Support

- *Led a **6-month managed services engagement**, serving as primary point of contact for governance, issue resolution, and continuous improvement*
- *Conducted daily operational calls and monthly workflow review sessions, proactively identifying and resolving platform issues before business impact*
- *Delivered monthly consulting recommendations to optimise existing workflows, improving solution performance and client satisfaction over the engagement period*

5. CMDB & Integration Engineering | Mueller Water Products (BAU Lead Developer)

- *Integrated **Automox** with ServiceNow to automate endpoint discovery and software inventory population into CMDB, ensuring real-time data accuracy*
- *Configured **Auvik** integration for network event and alert ingestion, enabling proactive incident creation and reducing mean time to detect (MTTD) for network anomalies*
- *Designed and implemented **CMDB IRE (Identification & Reconciliation Engine)** rules — including identification rules, reconciliation logic, and data source precedence — eliminating duplicate CIs and ensuring data consistency*
- *Collaborated with stakeholders to define CI classes, relationships, and normalization standards aligned with ITOM requirements, establishing the CMDB as a reliable **single source of truth***

Input Zero Technologies Pvt. Ltd. | Solution Consultant & Pre-Sales (Gurugram) June'23 - Apr'25

Drove pre-sales and solutioning efforts by delivering rapid, high-impact Proof of Concepts (POCs) to enterprise prospects across BFSI, FMCG, Manufacturing, and Aviation sectors. Owned the full pre-sales cycle — from initial client discovery calls

and live demonstrations through effort estimation, SOW authoring, architecture modelling, and handover to delivery teams. Specialized in translating complex client pain points into compelling, platform-native ServiceNow solutions.

Key Projects

1. DocIntel — AI-Powered Invoice Automation | Pernod Ricard India

- *Designed and demonstrated an **AI/ML OCR-based document intelligence solution** on ServiceNow App Engine, automating end-to-end invoice handling and vendor portal management*
- *Built automated validation logic for critical fields — PO numbers, GST, and compliance data — eliminating manual verification effort and reducing invoice processing errors*
- *Showcased a scalable, integration-ready architecture capable of handling high invoice volumes without additional licensing overhead*

2. NOW Assist Event Priority Handler | Adani Enterprise

- *Architected and delivered a **Natural Language Processing (NLP) + ServiceNow LLM-powered** event prioritization solution using NOW Assist (GenAI capabilities)*
- *Enabled codeless, AI-driven triage of major events — significantly reducing manual system triage effort and accelerating incident response for operations teams*
- *Demonstrated platform-native GenAI adoption without custom model development, making the solution fast to deploy and easy to maintain*

3. Discovery & Asset Management POC | JKCL Manufacturing

- *Delivered a fully functional Discovery and Asset Management POC across **2 manufacturing locations and a central office** — covering both IT and Enterprise-class assets — in just **12 days***
- *Competed directly against the client's incumbent tool and demonstrated a **40% improvement in CMDB accuracy**, winning stakeholder confidence*
- *Streamlined the client's Procurement and Disposal lifecycle within the same POC scope, showcasing end-to-end HAM/SAM capability*

4. Software Asset Management & Discovery | SLK Software

- *Automated the end-to-end software distribution process by integrating **Microsoft Intune with ServiceNow Discovery and Agent Client Collector (ACC)***
- *Enabled real-time software inventory visibility and compliance tracking, reducing manual IT overhead in software lifecycle management*

5. HR Service Desk & Catalog Automation | Adani Airports

- *Designed and delivered HRSD catalog workflows covering **Onboarding, Offboarding, POSH compliance, and Anti-Harassment** processes on the ServiceNow platform*
- *Standardized and digitized HR service delivery, reducing dependency on manual HR coordination and improving employee experience at scale.*

EDUCATION

University Institute of Engineering and Technology, Kurukshetra University, India
B.Tech in Electronics and Communication Engineering (8.34 CGPA)

Certification

- *CSA (Certified System Administrator)*
- *Certified Implementation Specialist - CIS-ITSM · CIS-HAM · CIS-SAM*

Skills

ServiceNow Modules: ITSM · CMDB · HAM · SAM · App Engine · CSM · ITOM · HRSD · NOW Assist · AI Agent
Development: Flow Designer · Integration Hub · Business Rules · Script Includes · Client Scripts · GlideRecord · GlideAjax · REST/SOAP · Transform Maps · Update Sets
CMDB & Discovery: IRE · Discovery · Agent Client Collector (ACC) · CI Class Management · Normalization
Integrations: Automox, Auvik, Microsoft Intune, Workday, SCCM, Success Factors REST APIs
Consulting: Solution Architecture, SOW, Pre-Sales, POC Delivery, Stakeholder Management · Managed Services, Training
Other: JavaScript · Python · Agile · ITIL · draw.io

Achievements

National Athlete — 1st Runner-Up, National Kho-Kho Championship
Academic Excellence — Secured 100% Scholarship, 3rd Rank in District (DPS Admission Exam)
